PROFESSIONAL SUMMARY

Software Engineer with over 3 years of experience developing full-stack and backend systems; having completed a master's degree in computer engineering. Experienced in developing scalable API's, data-driven applications, and AI-powered solutions. Strong foundation in Python, system design, and modern web technologies, with growing expertise in LLMs, RAG pipelines, and AI assisted development. Proven ability to lead projects, collaborate across teams, and deliver production-ready systems with measurable impact.

EDUCATION

1. University of Guelph – Master of Engineering, Computer Engineering

Completed: May 2026 | GPA: 85% (3.4/4.0)

Coursework: Reinforcement Learning, Advanced Soft Computing, Project Management

2. Canadian Career Education College – Diploma Certificate in Personal Support Worker

Graduated: March 2025 | GPA: 94% (3.76)

3. University of Ghana – BSc. Computer Engineering

Graduated: 2021 | GPA: 3.3/4.0(Second-Class Upper Honors)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Architecture

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript

Backend: Django, Flask, Spring Boot, LangChain

Frontend: React, Next.js, Angular

Databases: PostgreSQL, Firebase

Concepts: OOP, Design Patterns (Factory, Mediator), REST APIs, Authentication, Test Automation

Tools: Git, Agile Development

EXPERIENCE

- **Software Application Specialist**

Attentive Science, USA | *Jun 2023 – Nov 2024*

1. Designed and implemented an automated classification system in Python to categorize research reports, improving processing speed by 35%.
2. Built a scalable data extraction pipeline for pharmaceutical submissions, standardizing structured outputs across regulatory formats.
3. Applied object-oriented design principles and Factory/Mediator patterns to create extensible extraction workflows.
4. Developed a Flask-based validation engine integrated with Electron, reducing manual validation errors and improving compliance reliability..

- **Software Engineer**

Apptechhubglobal, Ghana | *May 2022 – May 2023*

1. Architected and implemented RESTful APIs using Django to manage authentication, file storage, and permission controls.
2. Designed backend services supporting concurrent users for an audio streaming platform with optimized request handling.
3. Built a Progressive Web App (Angular + Tailwind) improving mobile responsiveness and user retention.
4. Automated end-to-end test cases using Katalon Studio, reducing regression testing time by 40%.

- **Teaching & Research Assistant – Computer Vision**

University of Ghana | *Sep 2021 – Sep 2022*

1. Assisted in teaching core Computer Vision concepts and supervised lab sessions using Python.
2. Guided students in building convolutional neural network models, improving assignment completion rates by 20%.
3. Evaluated student implementations for correctness, performance, and algorithmic soundness.
